

SCUBA Products

Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features: a **patented flushing system** that clears sand and debris from the unit, is **salt-water proof**, and will withstand **high-temperature** environments; a **patented Q/C Connector System** that provides quick and easy connection/disconnection of gear.

The **RT3 series** features **80# break-strength** and uses Nylon/Kevlar line. The **RT2 series** and the **RT4 series** features **60# break-strength** and uses **Nylon Coated Stainless Steel cable**. All three series feature high-impact housing, multiple spring forces and multiple mounting options.

The **New RT5 Series Micro** features a 50# break-strength and uses a Spectra/Nylon line. It is ideal for small items like lobster gages, knives, slate pencils, and safety whistles.

All SCUBA retractors feature the exclusive (**Quick Connect**) **System** that allows gear to be easily disconnected from the Gear Keeper® while keeping gear close at hand and reducing the overall length of the tethering system.

Choosing the right Gear Keeper is easy because they're packaged by application (console, flashlight, etc.): the right force, mounting option, and accessories needed.

The **RT4** with the **Combo mount** offers divers one product with two mounting options: **Snap Clip** mount to a D-ring or **Threaded Stud** mount to a webbing strap/BC pocket for even better streamlining.

The **RT3 12-oz Locking Gear Keeper®** is the perfect solution for tethering heavy lights and cameras. Locked on land and unlocked underwater.

■ Brass Snap Clip Mount

Also available in:
Plastic Snap Clip Mount
Mounting Bracket

■ High-Impact Case

■ Patented
Flushing System
Salt Water Proof

■ Multi-Force Options
